

Legacy Data Integration Systems Are Costing You More Than You Think

Transform your data ecosystem with scalable iPaaS solutions from Xerox® Data Solutions.

As digital ecosystems grow, disconnected systems and manual integrations slow innovation. Xerox® Data Solutions helps organizations modernize integration with scalable, low-code iPaaS frameworks—enabling seamless connectivity across apps, data, and workflows.

YOUR CHALLENGES

- **Complex, outdated integrations:** Legacy point-to-point APIs are non-standard, undocumented, and expensive to maintain—creating bottlenecks for growth and modernization.
- **High maintenance overhead:** Custom transformations, file transfers, and hand-coded scripts require ongoing support, driving up cost and reducing efficiency.
- **Accumulating technical debt:** Each new manual integration adds complexity, slows development, and makes it harder to adopt cloud solutions or new applications.
- **Siloed systems and limited visibility:** Disconnected applications block real-time data flow, making it difficult to gain insights, improve processes, or make confident decisions.

- **Governance and compliance gaps:** Without a unified integration framework, enforcing consistent validation, security, and data quality across systems becomes a challenge.
- **Limited agility:** Outdated architectures restrict your ability to innovate, adapt quickly, or reduce time-to-value on digital transformation initiatives.

HOW CAN WE HELP

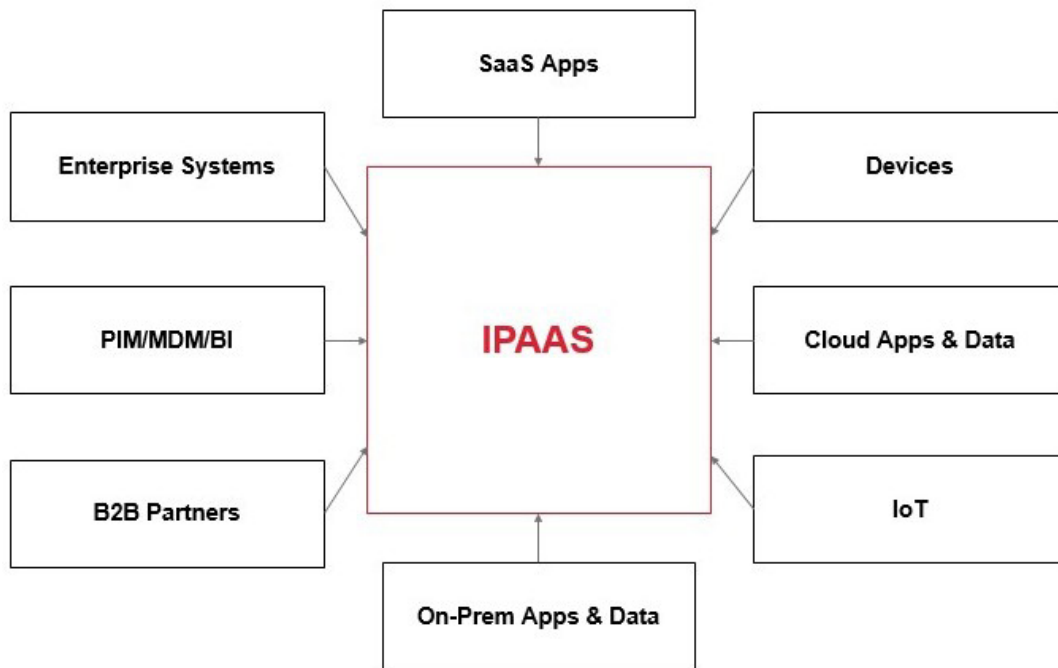

As early adopters of Integration Platform as a Service (iPaaS), Xerox® Data Solutions helps organizations modernize how they connect applications, data, and workflows. We unify systems like PIM, MDM, ERP, CRM, and BI to create a connected, cloud-ready foundation for data-driven transformation.

Our experts design scalable integration strategies using low-code/no-code tools, reusable templates, and automation—reducing complexity, eliminating silos, and cutting technical debt. The result? Streamlined operations, faster outcomes, and measurable cost savings.

We help you:

- **Centralize integration management:** Create a single, governed hub for connecting enterprise systems and business processes.
- **Streamline application & data integration:** Standardize integrations across SaaS, on-premise, and legacy environments using reusable patterns.
- **Strengthen API & data governance:** Build secure, compliant, and interoperable API ecosystems with consistent validation and data standards.
- **Automate & orchestrate workflows:** Replace manual steps with automated, event-driven processes that improve speed and accuracy.
- **Accelerate time-to-value:** Deliver faster outcomes with low-code/no-code toolsets that reduce technical debt and support long-term scalability.

Modern Integration Made Simple with iPaaS

iPaaS lets you start small and scale over time. Whether you're replacing legacy integrations or building new ones, it's the ideal moment to unlock the flexibility, speed, and efficiency of a modern integration platform.

WHO USES IPAAS?

- Higher education (colleges and universities)\
- Healthcare organizations
- State and local government agencies
- B2B and B2C companies
- Service and professional organizations

WHY IPASS IS ESSENTIAL

- All integrations follow a unified, consistent protocol
- Each new integration requires less effort and lower cost
- Centralized Extract, Transform, Load (ETL) processes
- Enhanced governance and security across all connections

OUR PREMIER IPAAS PARTNERS

- Boomi VAR and implementation partner with 32 unique certifications
- MuleSoft – Partner since 2021
- Azure Data Factory (ADF) – Microsoft Gold-certified partner

“We selected Xerox Data Solutions because of their expertise with Product Information Management and our chosen iPaaS solution. We knew of reputation of Xerox for successful implementations and felt secure partnering with them for our implementation project. We look forward to continuing our relationship with Xerox Data Solutions in the future.”

David Upton, CIO, Lowe's Pro Supply

Xerox IT Solutions: Proven expertise delivered with a frictionless client experience.
